WEATHER OF CONCERN

Weather of Concern

- Red Flag Warning in effect from 1600 to 2100 hours this evening for areas in Del Norte County

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

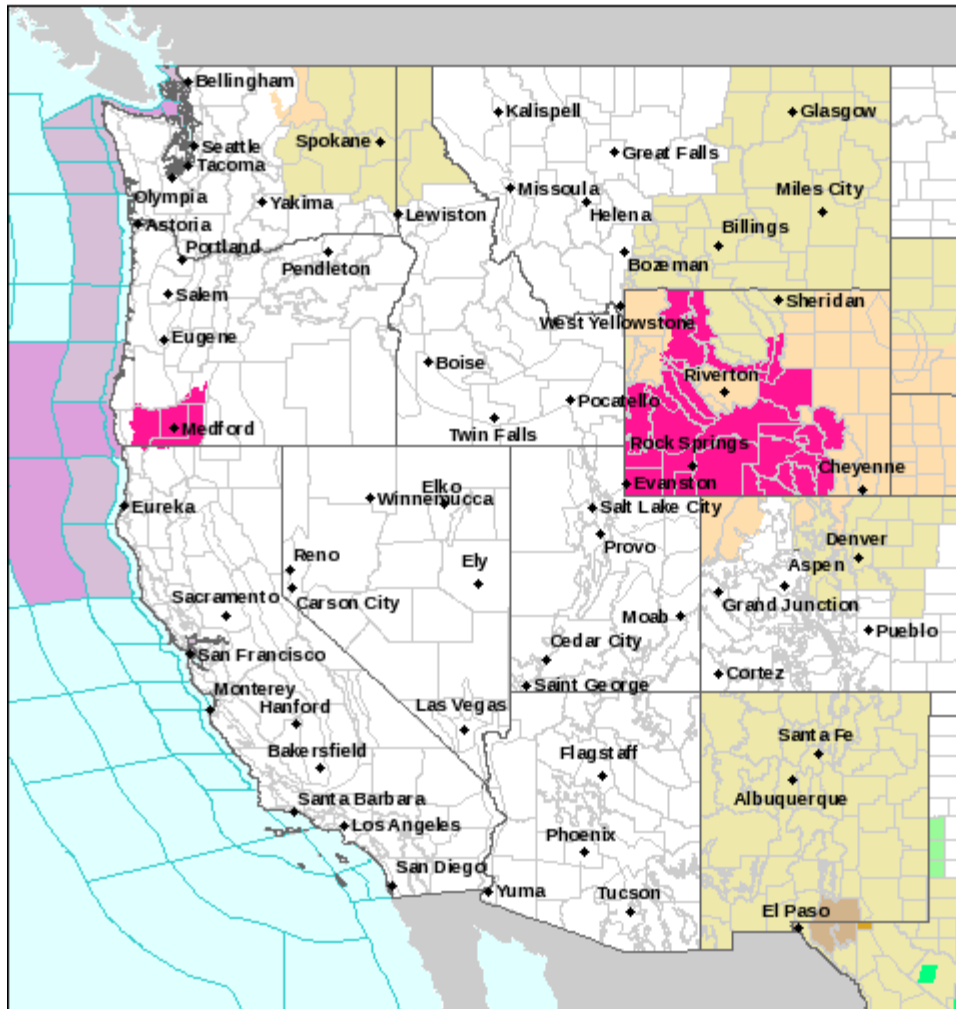

NORTHERN CALIFORNIA

High pressure will continue today with temperatures remaining above normal. They should generally be near yesterdays highs for most areas with only slight cooling expected today. The marine layer is around 1500 feet deep with low clouds into the western delta this morning. Temperatures have been trending cooler for the Bay Area and Northern Sacramento Valley with the remaining areas near yesterdays values. Sunday through Tuesday is when we expect a decent cooling trend. Temperatures will be dropping each day by 5 degrees or more. Monday and Tuesday's temperatures will feel a bit more fall like than summer. The trough is mostly dry but will bring some chances of showers and thunderstorms along the crest Monday and Tuesday along with some breezy conditions late Sunday and Monday.

SOUTHERN CALIFORNIA

A trough of low pressure will move southward through the western states closing off over California for Monday night through Tuesday night before weakening and moving inland for Wednesday through Friday. This will bring stronger onshore flow with cooling, deepening of the marine layer and gusty southwest to west winds in the mountains an deserts. This will bring slight cooling on Sunday, the greatest cooling of around 5 degrees on Monday and slight additional cooling on Tuesday with high temperatures 5 to locally 10 degrees below average in the valleys for Monday and Tuesday. Night and morning coastal low clouds and patchy fog will spread inland into portions of the inland valleys.
